

## Canvas Owners for their opinion.

- Is curbside appeal essential?
- We want to promote a positioning statement objective:

*"A serene and relaxing garden space calms the nerves and relieves daily stress. Plants should be chosen to add to the beauty and tranquility of the garden area plus stimulate sensory perceptions."*

- Baseline: condos (in our immediate circle of neighbors) have invested in gardens and fencing for security.

- Concord's intention of replacing plants and ground cover with more gravel should be rejected. It will be grating to the nerves, harsh on the eye, and not at all conducive to creating a garden that is relaxing parkland setting.
